From the Head Table

'Be creative' is a common advice given by all elders. Science is always creative and scientists creatively invent new things that are useful for day today life of human being. One can be creatively productive; at the same time, that creativity may also lead to destruction. Atom bomb explodes due to nuclear fission: The same fission has several positive benefits too: it helps cure cancer; it assists space exploration; it

is used as fuel in nuclear reactor, electric grid etc., But, at the same time, human race is under the threat of mass destruction; its negative effects were experienced in Hiroshima and Nagasaki (1945).

We should acknowledge the fact that the capacity to 'be creative' is the gift of the divine Creator, the Almighty. The book of Exodus says, "He has filled them with skill to do every kind of work done by an artisan or by a designer or by an embroiderer... or by a weaver—by any sort of artisan or skilled designer" (Exodus 35:35). Therefore, we cannot but be positively creative as we all draw the power to be creative from the almighty God who is eternally 'good.' This is the reason St. Paul says, "Finally, beloved, whatever is true, whatever is honorable, whatever is just, whatever is pure, whatever is pleasing, whatever is commendable, if there is any excellence and if there is anything worthy of praise, think about these things" (Philippians 4:8).

We have heard, 'Busy hands achieve more than idle tongues' (Matshona Dhlwayo) and 'An idle brain is the workshop of the devil' (English Proverb). Therefore, as students, you are expected to be creatively active in your studies. This creative involvement should not be restricted to academic matters alone; it should be more so in the common concerns of the humanity as a whole. Here, it is quite opportune to remember Greta Thunberg, a Swedish student, who inspired an international movement to fight climate change.

May the almighty Lord bless you all so that you will be growing academically and get creatively involved in matters of social concern as well!

Principal's Press

Dear Christites,

Creative thinking can mean many different things to different people, depending on their perspective. Creative abilities include inventiveness, imagination, innovation, originality, individuality, artistic ability, expressiveness, inspiration, vision, creative power, creative talent, creative gift, creative skill, resourcefulness, ingenuity, and enterprise. According to some researchers, there are different stages of creativity. A common concept in popular culture is "Big-C" creativity: extraordinary ideas of remarkable people, such as Leonardo da Vinci's Mona Lisa or Albert Einstein's paradigm-shifting theories. Moreover, there are everyday forms of creativity: a person's "Mini-c" creativity, when they learn something new and their perspectives change, and a person's "Little-c" creativity, when their lives become embedded with everyday creative thoughts and actions.

Creativity is one of the superpowers that can help us become the best version of ourselves and make the world a better place. The great thing is that everyone has the power to be creative in their own way. But it can also take some work. As Mary Lou Cook said, "Creativity is inventing, experimenting, growing, taking risks, breaking rules, making mistakes, and having fun."

Every one of us is born with a creative mind, but it slowly becomes obsolete if we don't use it. Therefore, creativity is of paramount importance to every individual. It makes us live a life that is full of exciting experiences and is fulfilling. Dear Students, you have to be creative in your life because it makes learning fun, allows you to discover yourself, express yourself, aids your emotional development, and lowers your stress levels. In the book *Wired to Create*, we read "Creativity isn't just about innovating something or making art, it's about living creatively. Then we can approach any situation in life with a creative spirit." You'll be able to overcome all obstacles and reach the heights of success if you use your creativity in the right way. Therefore, fan the flames of your creativity and use it in your learning process.

Message of the STAFF SECRETARY

Creativity is a unique talent which every student should inculcate by oneself to develop the intellectual abilities. Creativity is a process for which you have to work hard constantly. Now, in recent days, all are having time to think about ourselves and develop the creative talents. Take some time to think about yourself, list out a few things which you struggle to do. Focus on the hard things with some simple and creative techniques and try to break out of the fear. It's your time to focus on yourself and develop your creativity. Creativity makes the world go round!

CO-ORDINATOR'S MESSAGE

Creativity is exploring thoughts or ideas that are new or different in some way from previous thoughts and ideas. Exploring thoughts and ideas can be expressed by people in many ways. Creativity is different to different people but everyone is creative in their own way. Artistry is important because it gets people to think and enrich innovations. Being innovative opens the door for new and different things. It is not just important for the individual person; it is also good for society as a whole. "Life doesn't happen to you, it happens for you". All the best!

ALUMNI TALK

I am Radhiya, former student of Christ Matriculation Higher Secondary School. I am a classical dancer and choreographer, veena instrumentalist and vocalist. I had been studying in our school for 7 years. Our school is not only focusing on studies but also on other co-curricular activities. Our school is one of the main reasons for my successful travel in fine arts. Our teachers are the best! I don't know whether they are only teachers or the combination of god, parents, teachers and friends. Our school helped me to get several opportunities to express my talents. In 2015 our school gave me an opportunity to participate in the CMI Inter-school competition held at Shoranur, Kerala. This gave me great confidence in my artistic talents. Every artist needs to be respected in the way our school gave respect to me and towards my art. As a choreographer and dancer, they gave me many opportunities to express my talents. Our school greatly respects arts and sports equally as education. As a dancer I received many prizes only because of our school's support. For the first time I have choreographed a classical dance with fire pot for the cultural fest in 2018. With much practice and effort, I was able to balance the fire pot. I thank our school for giving me a fabulous opportunity to express my talents and also for recognizing my effort in the cultural fiesta 2018. Thank you!

A PARENT'S MESSAGE

Dear students, as parents, all of us have many dreams and ambitions about you all. Many of you are very much aware of what we, as parents, really want from you. More than that, we would really wish you all to follow these:

- Love God and fear God; make sure God is first in your life.
- Be kind and generous to everyone; help others whenever possible and don't be selfish in life. The more you give, more the blessings you will receive from God.
- Be nice to the nature; plant at least one sapling each wherever you go.
- Dream big, achieve great heights; don't restrict your desire to become rich, popular and powerful; but at the same time, be humble and don't become proud when you get there.
- Last but not the least, don't ignore your health, eat well, exercise regularly and spread a healthy vibe to all around us.

Thank you all!

SOUL READERS

"A writer only begins a book
A reader finishes it."

Our Higher Secondary student Ms. Susithra D (G11) shared about the book she was inspired with – the story, moral and the reasons for her inspiration. The story goes like this: Once upon a time, a wise Brahmin went to the king and asked for alms. The king gave him few gold coins. But the Brahmin refused and said that he will take alms that have been earned by hard work only. The king, who

was living with the taxes paid by the people, disguised himself, worked as a labourer, earned a silver coin, and gave it to the Brahmin. The Brahmin buried the coin and it grew into a tree which had gold coins as fruits. The news reached the king and he visited the Brahmin, and he uprooted the tree and gave it to the king saying, "It's the fruit of your hard work." The king realized the importance of hard work.

My inspiration: -I was inspired a lot by the Brahmin, because he taught a lesson to the king and the king learned the importance of hard work.

Moral of the story: - Hard work always pays and good decision never fails.

Kamarajar Day

Kudos to the man behind the education today,
For making us a mouldable clay.
He's the man to be thanked everyday,
For giving us a thornless pathway.
He lived a life of easy-peasy,
For he believed in democracy.
His memories never fade away,
Anchored like a positive portray.
He was an immaculate individual,
Who lived in a vision of inter-individual
Let's celebrate his day,
With no further delay

- Isha Whitney, G9-A

People's Leader Kamaraj

You only came to power once!
But you did as good as many regimes speak!
You are an example of simplicity!
Our Tamil Nadu people are the breath of your life!
He forgot himself, thought of others,
Forgot his home and lived for the country!
He built many dams and stored water!
The one who protects agriculture with that water!
The time he lived was epic!
The years he lived were golden!
This is the great leader who has served to see the upliftment
In the lives of the poor simple people!
He is the one who did without the uneducated
Because the country will prosper if education is better!
One who renounces his well-being to live for the good of others
The one who has duty as the eye!
He was born before independence and worked for our country!
He is the one who lived the ideal life!
This is the leader who does not like millions!
Honesty is his identity and simplicity his incarnation.

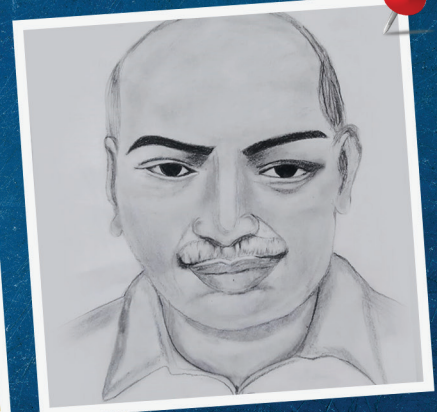

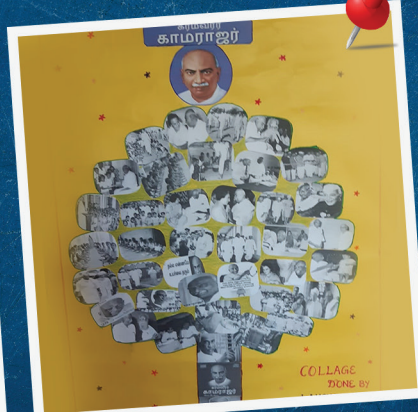

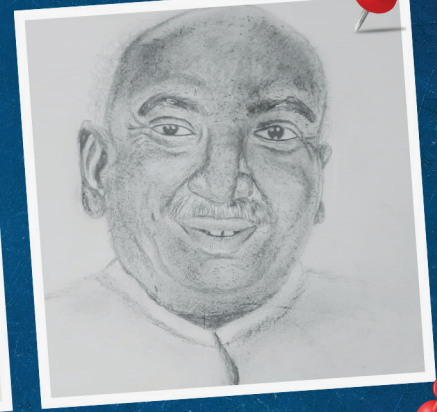

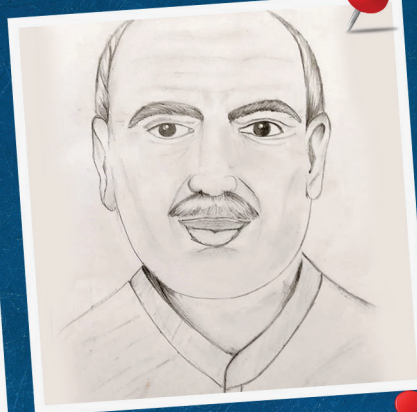

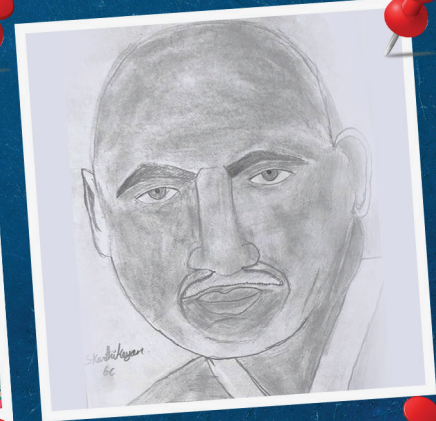

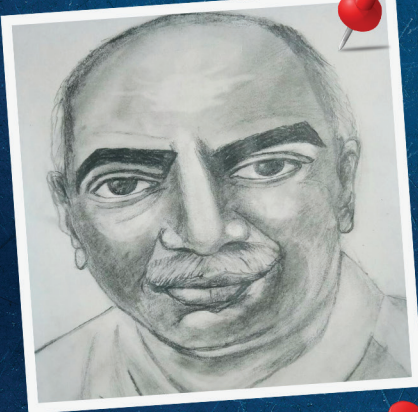

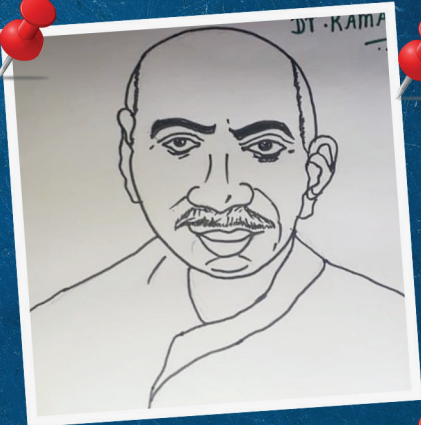

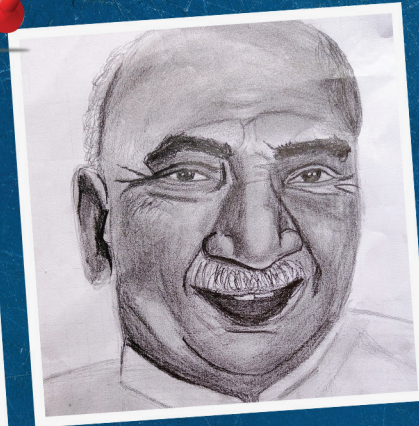

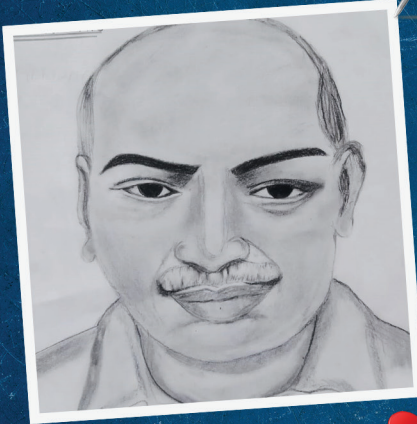

- V. Hayanthika, G6-D

National Parent's Day

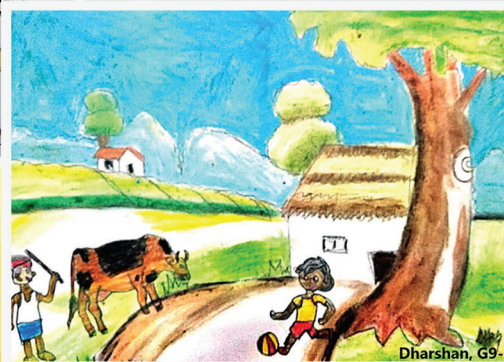

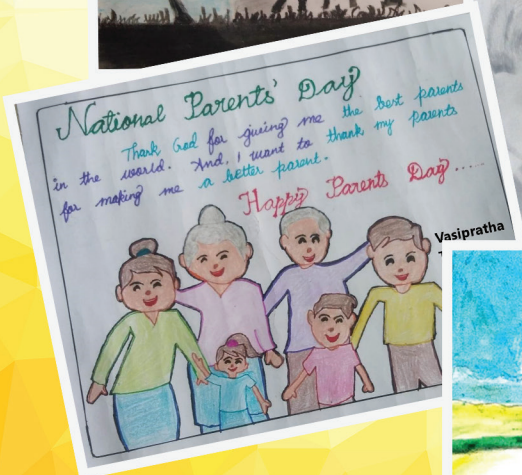

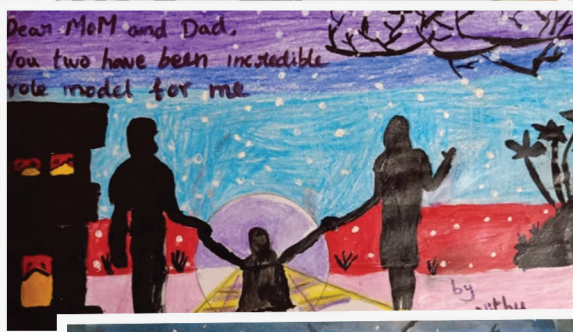

The real spine-breaker of my life are my parents
Being with them, I could smell the positive fragrance!
My parents are always special in every way,
Encouraging me more and more each passing day
You've never said no to any of my stuff
I know you've worked really hard for me
You've both helped me through many trials and tribulations
You've made things better in every situation
You both are the reason why I'm so strong
With you two at the helm not a thing could go wrong
You've made feel confident, when I felt unconfident
Your pretty smiles make me forget about my negative thought
Thank you both for always being there,
And showing me that you truly care
As you do everything for me,
I'm never gonna stop fulfilling my dream
One day, I'm sure that proud moment will happen in our life
You are gonna be my proud Mama, Appa
Words could never explain how I feel about you
But I hope you know that I truly love you two!!
I truly love you two.
